INDEX TO VOLUME XXIV

The asterisk * preceding the page number indicates an original article in this Journal. The letter T preceding the page number indicates a paper reported in the Transactions of the American Association of Neuropathologists. The letter D preceding the page number indicates a discussion of an original article or some other item published in the Journal. The letter B preceding the page number indicates a book review. Subject entries are made for all articles. Author entries are made for original articles and Society Transactions.

Aberfeld, D., see Green, L. N., *682
Adachi, M., see Feigin, I., T168
Adenosinetriphosphatase activity in cerebral edema due to alkyl tin intoxication, T152
Agenesis of corpus callosum, association with cerebral artery aneurysm in infancy, *492
Aleu, F. P., D157, D160
—, R. D. Terry, and H. Zellweger, electron microscopy of two cerebral biopsies in gargoylism, *304
Allen, N., and M. Swanton, microchemical and histochemical observations in globoid cell leukodystrophy, T174
Alykyl tin intoxication, adenosinetriphosphatase activity in cerebral edema due to, T152
Alzheimer's disease, chemical studies on, *211
Amaurotic idiocy, histochemical studies on lymphocytes in, T176
Ames, A., see Webster, H. deF., T142
Angioma, cerebral, of Sylvian fissure as a cause of complicated cerebral palsy, T175
Antimetabolite, 6-aminonicotinamide, histochemical study of effect on lumbar spinal cord of adult rat, *97
April, R. S., see Sher, J. H., T175
Aponte, G. E., see Mancall, E. L., *85
Aronson, S. M., see Sher, J. H., T175
Asbury, A. K., and R. G. Ojemann, neuropathologic study of fourteen cases of malignant brain tumor treated by neutron capture therapy using Boron-10, T157
—, D158, D159
Astrocytes, VII, reactions of, to cryptococcal polysaccharide implantation, fine structure of cerebral fluid accumulation, *386
—, response to brain injury, T142
Atherosclerosis of carotid and vertebral arteries, extracranial and intracranial, *455
Austin, J. H., globoid bodies: their separation and study by thin-layer chromatographic microtechniques in 7 patients with globoid (Krabbe) leukodystrophy, T170, D171, D172
—, and D. Lehfeldt, studies in globoid (Krabbe) leukodystrophy, III, significance of experimentally-produced globoid-like elements in rat white matter and spleen, *265
A-V shunt in association with anomalies of great vein of Galen producing cardiac failure in the new-born and in early childhood, clinicopathologic report of three cases, T174
Axonal regeneration in spinal cord of adult rats, electron microscopic observations on, T138

Baker, R. N., see Tomiyasu, U., T177
Ballantine, H. T., Jr., see Mayman, C. I., *502
Barlow, C. F., D148, D151
Bauer, W. C., see Estable-Puig, J. F., *531
Becker, N., D165
Beggs, J., see Waggener, J. D., *430
Berry, R. G., see Mancall, E. L. *85
Biochemical and morphologic study of edema associated with intracerebral tumors in rabbits, T153, *244
Blinderman, E. E., and C. Markham, temporal and spatial evaluation of cerebral edema secondary to cold probe lesions, T145, D146
Blood-brain barrier, relationship to extracellular space, T152
Blumberg, J. M., see Estable-Puig, J. F., *531
Book reviews, B178, B179, B536, B690
Bornstein, M. B., see Lehrer, G. M., T168
Boron-10 used in neutron capture therapy, neuropathologic study of fourteen cases of malignant brain tumor treated by, T157
Brain injury, response of astrocytes to, T142
Brightman, M. W., distribution within brain of ferritin injected intraventricularly, T147, D148
Brotz, M., see Norton, W. T., *352
Brownson, R. H., W. M. Shanklin, and D. B. Suter, a study in chronic brain radionecrosis, T162
— D140
— D163
Budzilovich, G. N., H. Most, and I. Feigin,

latency and pathogenesis of schistosomiasis of spinal cord, T167, D167
Bunn, S. M., see Waggener, J. D., *430

Cancilla, P. A., and H. M. Zimmerman, the fine structure of a cerebellar hemangioblastoma, *621
Carcinogenic hydrocarbons, observations on lesion, induced by T159
Carmel, P., see Schotland, D. L., *629
Carnecki, G., see Clasen, P. M., T152
Carpenter, S., see Lampert, P., T151
—, see Earle, K. M., T164
Case of hypertropic interstitial neuritis co-existing with dementia and cerebellar degeneration, *682
Ceballos, R., J. Morris, and H. C. H. Fang, A-V shunt in association with anomalies of great vein of Galen, producing fatal cardiac failure in the new-born and in early childhood, a clinicopathologic report of three cases, T174
Cell size, distribution of, in lateral geniculate nucleus in man following transneuronal cell atrophy, *653
Cell size, laminar pattern and distribution of, in lateral geniculate nucleus in man, *645
Cellular vulnerability and pathogenesis, experimental rabies, using fluorescent antibody staining, *662
Central nervous system, effects of laser radiation, T164
Cerebellar degeneration and dementia in a case of hypertrophic interstitial neuritis, *682
Cerebellum, human, some observations on the external granular layer of, T176
Cerebellum of rat, quantitative enzyme histochemistry during development *in vivo* and *in vitro*, T168
Cerebral angioma of the Sylvian fissure as a cause of complicated cerebral palsy, T175
— artery aneurysm in infancy, association with agenesis of corpus callosum, *492
— palsy, complicated, cerebral angioma of the Sylvian fissure as a cause of, T175
— parenchyma adjacent to heterologous intracerebral tumors, morphological and permeability changes in, *49
— swelling associated with rapid hemodialysis of uremic dogs, T147
Chang, C. H., D158, D159
Chelatable iron in senile siderocalcification of human brain, *675
Chemical studies on Alzheimer's disease, *211
Clasen, R. A., see Rosomoff, H. L., T146
—, D149
—, P. M. Cooke, S. Pandolfi, and G. Carnecki, relationship between extracellular space and blood-brain barrier, T152
Cold probe lesions, temporal and spatial evaluation of cerebral edema secondary to, T145
Collagen, fibrous, long-spacing in tumors of the nervous system, *40
Convulsions, mental retardation and cortical blindness, electron microscopic study in a patient with unusual neocortical presynaptic terminals, *539
Cooke, P. M., see Clasen, R. A., T152
Corpora amylacea, ultrastructure of, *25
Cortical blindness, convulsions, and mental retardation, electron microscopic study in patient with, unusual neocortical presynaptic terminals, *539
— dysgenesis, large defects in cerebral hemispheres associated with, *512
Courville, C. B., relation of neuromyelitis optica to multiple sclerosis, T171
Cowan, D., see Schotland, D. L., *97
Cravioto, H., D139
—, electron microscopic studies on the developing human nervous system, II. the optic nerves, T166
—, D167
—, D172
—, D173
Cressman, M., see Lampert, P., T138
Cryptococcal polysaccharides, extracellular spread in acute stage of cerebral fluid accumulation, fine structure of, T150
— polysaccharide implantation, VII, reactions of astrocytes to, fine structure of cerebral fluid accumulation, *386
Cytomegalic virus infection, probable, neuropathologic features of human organ transplantation, *415

Dayes, L. A., see Pappius, H. M., T147
Dekaban, A., large defects of cerebral pallium associated with malformation of cortex, T136
—, large defects in cerebral hemispheres associated with cortical dysgenesis, *512
Dementia and cerebellar degeneration in case of hypertrophic interstitial neuritis, *682
Demyelination and remyelination in experimental allergic encephalomyelitis, further electron microscopic observations, *371
Dibenzanthracene, intracerebral implantation of, virus particles in reactive cells induced by, *225
Diffusion of ferritin within the peripheral nerve sheath; an electron microscopy study, *430
Disseminated microabscesses of the central nervous system, T175
Distribution of neuroaxonal lesions in mice injected with iminodipropionitrile with special reference to the vestibular system, *599
— within brain of ferritin injected intraventricularly, T147
Dossetor, J. B., see Pappius, H. M., T147

Double traces in study of vascular permeability in brain, T149
Dreyfus, P. M., regional distribution of Transketolase in the normal and thiamine deficient nervous system, *119
Duffell, D., and E. Nelson, neoplasms in hamsters induced by simian virus 40; light and electron microscopic observations, T161
—, D162
Duffy, P. E., and V. M. Tennyson, phase and electron microscopic observations of Lewy bodies and melanin granules in the substantia nigra and locus caeruleus in Parkinson's disease, *398

Earle K. M., x-ray diffraction and other studies of calcareous deposits in human pineal glands, *108, T137
—, D138
—, S. Carpenter, U. Roessmann, M. A. Ross, J. R. Hayes, and E. Zeitler, central nervous system effects of laser radiation, T164
—, D164
Edelman, F. L., W. A. Levy, and L. C. Scheinberg, is brain an immunologically privileged site? (a histological study of the brain's reaction to tumor transplants), T160, D161
Edema associated with intracerebral tumors in rabbits, biochemical and morphologic study of, T153
—, cerebral, due to alkyl tin intoxication, adenosinetriphosphatase activity in, T152
—, cerebral human, ultrastructure of, T150
—, cerebral, secondary to cold probe lesions, temporal and spatial evaluation, T145
Effect of metrazol on hemodynamics and impedance of the cat's brain cortex, *75
Effects of lead and other bivalent cations on pial arteries and their contractile response, T144.
Electron microscopic observations in metabolic myopathies (three types of hypokalemic periodic paralysis, thyrotoxic myopathy and steroid-induced myopathy), T141
—— observations on axonal regeneration in spinal cord of adult rats, T138
—— studies on the developing human nervous system, II. the optic nerves, T166
—— studies on vascular permeability in experimental allergic encephalomyelitis, T151
—— study in two case of Jakob-Creutzfeldt disease, *575
Electron microscopy of two cerebral biopsies in gargoylism, *304
Emboli, fibrocartilagenous, venous, to the spinal cord with necrotic myelopathy, T168
—, venous, fibrocartilagenous, to spinal cord with necrotic myelopathy, *63, T108
Embolism, local, T174
Engel, A. E., electron microscopic observations in metabolic myopathies (three types of hypokalemic periodic paralysis, thyrotoxic myopathy and steroid-induced myopathy), D141
Enzyme histochemical studies of senile plaques, *477
Epileptogenic lesions in the cat, experimental, neuropathological study of, *502
Estable, R. F. de, see Estable-Puig, J. F., T163
Estable-Puig, J. F., D161
—, R. F. de Estable, and W. Haymaker, fine structural changes in x-irradiated rat brain studied after fixation by chrome-osmium perfusion, T164
—, W. C. Bauer, and J. M. Blumberg, technical note, paraphenylenediamine staining of osmium-fixed plastic-embedded tissue for light and phase microscopy, *531
Experimental allergic encephalomyelitis, demyelination and remyelination in, further electron microscopic observations, *371
— allergic encephalomyelitis, electron microscopic studies on vascular permeability, T151
— brain injury following hypothermia, T146
— production of neurofibrillary degeneration, T139
— production of neurofibrillary degeneration, I. light microscopic observations, *187
— production of neurofibrillary degeneration, 2. electron microscopy, phosphatase histochemistry and electron probe analysis, *200
— rabies, studies of cellular vulnerability and pathogenesis using fluorescent, antibody staining, *662
— studies on thiamine deficiency of nervous tissue, using tissue culture technics, T139
External granular layer of the human cerebellum, some observations on, T176
Extracellular space, relationship to blood-brain barrier, T152

Fatal cardiac failure in the newborn and in early childhood, A-V shunt in association with anomalies of the great vein of Galen producing, clinicopathologic report of three cases, T174
Feigin, I., N. Popoff, and M. Adachi, fibrocartilagenous venous emboli to the spinal cord with necrotic myelopathy, *63, T168
—, See Budzilovich, G. N., T167
Ferritin, diffusion of, within peripheral nerve sheath, an electron microscopy study, *430

— injected intraventricularly, distribution within brain, T147
Fetal Minamata disease, a neuropathological study of two cases of intrauterine intoxication by a methyl mercury compound, *562
Fibrocartilagenous venous emboli to the spinal cord with necrotic myelopathy, *63, T168
Fibrous long-spacing collagen in tumors of the nervous system, *40
Fine structural changes in x-irradiated rat brain studied after fixation by chrome-osmium perfusion, T163
Fine structure of a cerebellar hemangioblastoma, *621
— of cerebral fluid accumulation, extracellular, spread of cryptococcal polysaccharides in the acute stage, T150
— of cerebral fluid accumulation, VII, relations of astrocytes to cryptococcal polysaccharide implantation, *386
Fiol, R. E., D167
Fisher, C. M., and W. E. Karnes, local embolism, T174
—, I. Gore, N. Okabe, and P. D. White, atherosclerosis of carotid and vertebral arteries, extracranial and intracranial *455
Fluid accumulation, cerebral, fine structure of, VII, reactions of astrocytes to cryptococcal polysaccharide implantation, *386
Formation of membranous cytoplasmic bodies in Tay-Sachs disease: an *in vitro* study, *256
Friede, R. L., D163, D168
—, enzyme histochemical studies of senile plaques, *477

Gangioblastomas, hemispheral, T175
Garcia-Chavez, C., and J. Moossy, cerebral artery aneurysm in infancy: association with agenesis of corpus callosum, *492
Gargoylism, electron microscopy of two cerebral biopsies in, *304
— and late infantile lipidosis, structure comparison of the major monosialogangliosides from brains of normal human, part I, *341
—, ultrastructural and biochemical observations on a case of systemic late infantile lipidosis and its relationship to Tay-Sachs disease and, *318
Garrow, F., and Pentschew, A., T137
Geller, L. M., see Schotland, D. L., *97
Globoid bodies: their separation and study by thin-layer, chromatographic microtechniques in 7 patients with globoid (Krabbe) leukodystrophy, T170
— cell leukodystrophy, microchemical and histochemical observations in, T174
— (Krabbe) leukodystrophy, globoid bodies, their separation and study by thin-layer chromatographic microtechniques in 7 patients with, T170
— (Krabbe) leukodystrophy, studies in, III, significance of experimentally-produced globoid-like elements in rat white matter and spleen, *265
Globoid-like elements, significance of experimentally-produced in rat white matter and spleen, studies in globoid (Krabbe) leukodystrophy, *265
Glycogenosis, diffuse, Pompe's disease with neuronal storage, *85
Glycolipids, isolation and characterization of main splenic, in normal organ and in Gaucher's disease: evidence for site of metabolic block, *290
Goldensohn, E. S., see Gonatas, N. K., *539
Golgi complex of the CNS: anatomotopographic studies following administration of prochlorperazine (Compazine S. K. F.) T165
Gonatas, J., see Gonatas, N. K., *318
—, see Ledeen, R., *341
Gonatas, N. K., D148, D170, D171
—, and E. S. Goldensohn, unusual neocortical presynaptic terminals in a patient with convulsions, mental retardation and cortical blindness: an electron microscopic study, *539
—, and J. Gonatas, ultrastructural and biochemical observations on a case of systemic late infantile lipidosis and its relationship to Tay-Sachs disease and gargoylism, *318
—, see Samuels, S., *256
—, R. D. Terry, and M. Weiss, electron microscopic study in two cases of Jakob-Creutzfeldt disease, *575
Gore, I., see Fisher, C. M., *455
Graziani, L. J., see Roth, R. G., *444
Great vein of Galen, A-V shunt in association with anomalies of, producing fatal cardiac failure in the newborn and in early childhood, clinico-pathologic report of three cases, T174
Green, L. N., I. Herzog, and D. Aberfeld, a case of hypertrophic interstitial neuritis coexisting with dementia and cerebellar degeneration, *682

Hartmann, H. A., see Slagel, D. E., *599
Hartstock, R., see Rosomoff, H. L., T146
Hayes, R., see Sidman, R. L., T172
Haymaker, W., see Estable-Puig, J. F., T163
Hemangioblastoma, Cerebellar, fine structure of, *621
Hemodialysis, rapid, of uremic dogs, cerebral swelling associated with, T147
Hemodynamics and impedance of cat's brain cortex, effect of metrazol on, *75
Herzog, I., W. A. Levy, and L. C. Scheinberg, biochemical and morphologic studies of cerebral edema associated with intracerebral tumors in rabbits, T153, *244
—, see Green, L. N., *682
Hirano, A., H. M. Zimmerman, and S. Levine, fine structure of cerebral fluid accumulation, extracellular spread of

cryptococcal polysaccharides in the acute stage, T150
—, H. M. Zimmerman, and S. Levine, fine structure of cerebral fluid accumulation, VII, reactions of astrocytes to cryptococcal polysaccharides implantation, *386
Histochemical studies on lymphocytes in amaurotic idiocy, T176
— study of the effects of an antimetabolite, 6-aminonicotinamide, on the lumbar spinal cord of the adult rat, *97
Histochemistry, quantitative enzyme, of rat cerebellum during development *in vivo* and *in vitro*, T168
— study, slide, on intermediary metabolism of various experimental tumors after intracerebral implantation, T155
Histologic picture of pinealoma in silver carbonate preparations, T154
"Hydranencephaly", infantile, T136
Hydrocephalus internus in the offspring of rats fed non-toxic amounts of tellurium during pregnancy, T137
Hypertrophic interstitial neuritis coexisting with dementia and cerebellar degeneration, case of, *682
Hypothermia, experimental brain injury following, T146

Ikuta, F., and H. M. Zimmerman, observations on lesions induced by carcinogenic hydrocarbons, T159
—, virus particles in reactive cells induced by intracerebral implantation of Dibenzanthracene, *225
Iminodipropionitrile, distribution of neuroaxonal lesions in mice injected with special reference to vestibular system, *599
Immunologically privileged site?, the brain, (a histological study of the brain's reaction to tumor transplants), T160
Infarction cerebral, serum acid phosphatase activity and, T176
In memoriam, Saul R. Korey, M.D., 1918–1963, *183
Intermediary metabolism of various experimental tumors after intracerebral implantation, slide histochemistry study on, T155
Intranuclear inclusions in meningiomas, T159
Intrauterine intoxication by a methyl mercury compound, fetal minamata disease, a neuropathological study of two cases, *563
Intraventricular injection of ferritin, distribution within brain, T147
Iron, chelatable, in senile siderocalcification of human brain, *675
Is the brain an immunologically privileged site? (A histological study of the brain's reaction to tumor transplants), T160
Isolation and characterization of the main splenic glycolipids in the normal organ and in Gaucher's disease: evidence for site of metabolic block, *290
Iwanami, H., see Yonezawa, T., T139

Jakob-Creutzfeldt disease, electron microscopic study in two cases of, *575
Jimpy: a mouse with inherited sudanophilic leukodystrophy, T172
Johnson, R. T., experimental rabies, studies of cellular vulnerability and pathogenesis using fluorescent antibody staining, *662

Karnes, W. E., see Fisher, C. M., T174
Katzman, R., D147, D153, D172
—, see Suzuki, K., *211
Klatzo, I., see Terry, R. D., T139
—, D145
—, I. Steinwall, E. Streicher, and D. E. Smith, use of double tracers in study of vascular permeability in brain, T149
—, D149
—, D150
—, H. Wisniewski, and E. Streicher, experimental production of neurofibrillary degeneration. I. light microscopic observations, *187
Koenig, H., D143
—, vital staining of neural lysosomes by basic dyes, T171, D171
Koenigsmark, B. W., and R. L. Sidman, response of astrocytes to brain injury, T142, D143
Korey, S. R., see Suzuki, K., *211
—, see Norton, W. T., *352
Koya, G., see Matsumoto, H., *563
Krigman, M. R., and E. E. Manuelidis, morphological and permeability changes in the cerebral parenchyma adjacent to heterologous intracerebral tumors, *49
Kugelberg-Welander syndrome (chronic spinal muscular atrophy) muscle fine structure in, *444
Kupfer, C., laminar pattern and distribution of cell size in lateral geniculate nucleus in man, *645
—, distribution of cell size in lateral geniculate nucleus of man following transneuronal cell atrophy, *653

Lampert, P. W., D137
—, and M. Cressman, electron microscopic observations on axonal regeneration in spinal cord of adult rats, T138, D138, D139
—, D141
—, and S. Carpenter, electron microscopic studies on vascular permeability in experimental allergic encephalomyelitis, T151, D151
—, D163
—, demyelination and remyelination in experimental allergic encephalomyelitis, further electron microscopic observations, *371

Lapham, L. W., [D]161
Large defects in cerebral hemispheres associated with cortical dysgenesis, *512
— — in cerebral pallium associated with malformation of the cortex, [T]136
Laser radiation, central nervous system effects of, [T]164
Latency and pathogenesis of schistosomiasis of spinal cord, [T]167
Lateral geniculate nucleus in man, laminar pattern and distribution of cell size in, *645
Lazarus, S. S., see Wallace, B. J., [T]169
Lead and other bivalent cations on pial arteries and their contractile response, [T]144
Ledeen, R., K. Salsman, J. Gonatas, and A. Taghavy, structure comparison of the major monosialogangliosides from brains of normal human, gargoylism, and late infantile systemic lipidosis, Part I., *341
Lehfeldt, D., see Austin, J. H., *265
Lehrer, G. M., [D]152
—, [D]156
—, and M. B. Bornstein, quantitative histochemistry of rat cerebellum during development *in vivo* and *in vitro*, [T]168, [D]169
Levine, S., see Hirano, A., [T]150, [D]151
—, [D]160
—, see Hirano, A., *386
Levy, W. A., see Herzog, I., [T]153
—, see Rubenstein, L. J., [T]155
—, see Edelman, F. L., [T]160
—, see Herzog, I., *244
Lewy bodies and melanin granules in the substantia nigra and locus caeruleus in Parkinson's disease, phase and electron microscopic observations of, *398
Liber, A. F., chelatable iron in senile siderocalcification of the human brain, *675
Lindenberg, R., and P. D. Swanson, infantile "hydronencephaly", [T]136
—, [D]136
Lipidosis, late infantile and gargoylism, structure comparison of major monosialogangliosides from brains of normal human, *341
—, late infantile, ultrastructural and biochemical observations on a case of, and its relationship to Tay-Sachs disease and gargoylism, *318
Liss, L., [D]155
—, hemispheral ganglioblastomas, [T]175
Local embolism, [T]174
Long, D. M., ultrastructure of human cerebral edema, [T]150
—, [D]151
Lymphocytes in amaurotic idiocy, histochemical studies on, [T]176
Lysosomes, neural, vital staining by basic dyes, [T]171

Malformation of cortex associated with large defects in cerebral pallium, [T]136
Mancall, E. L., G. E. Aponte, and R. G. Berry, Pompe's disease (diffuse glycogenosis) with neuronal storage, *85
Manlapaz, J. S., see Mayman, C. I., *502
Manuelidis, E. E., see Krigman, M. R., *49
Markham, C., see Blinderman, E. E., [T]145
Matsumoto, H., G. Koya, and T. Takeuchi, fetal Minamata disease, a neuropathological study of two cases of intrauterine intoxication by a methyl mercury compound, *563
Mayman, C. I., J. S. Manlapaz, H. T. Ballantine, Jr., and E. P. Richardson, Jr., neuropathological study of experimental epileptogenic lesions in the cat, *502
McArdle's disease (deficiency of muscle phosphorylase) ultrastructural studies of muscle in, *692
Medical profession and neuropathology, [T]167
Melanin granules and Lewy bodies in the substantia nigra and locus caeruleus in Parkinson's disease, phase and electron microscopic observations, *398
Membranous cytoplasmic bodies in Tay-Sachs disease: an *in vitro* study, *256
Meningiomas, intranuclear inclusions in, [T]159
Menkes, J. H., see Philippart, M., *290
Mental retardation, convulsions, and cortical blindness, electron microscopic study in patient with, unusual neocortical presynaptic terminals, *539
Metabolic block, site of, in Gaucher's disease, isolation and characterization of main splenic gycolipids in normal organ and in Gaucher's disease, *290
Metabolic myopathies (three types of hypokalemic periodic paralysis, thyrotoxic myopathy and steroid-induced myopathy), electron microscopic observations in, [T]141
Metrazol, effect of, on the hemodynamics and impedance of the cat's brain cortex, *75
Microabscesses, disseminated, of the central nervous system, [T]175
Minamata disease, fetal, a neuropathological study of two cases of intrauterine intoxication by a methyl mercury compound, *563
Monosialogangliosides from brains of normal human, gargoylism and late infantile systemic lipidosis, part I, *341
Moossy, J., see Garcia-Chavez, C., *492
Morphological and permeability changes in the cerebral parenchyma adjacent to heterologous intracerebral tumors, *49
Most, H., see Budzilovich, G. N., [T]167
Mucormycosis, clinical and pathological aspects, [T]177
Multiple sclerosis, relation to neuromyelitis optica, [T]171
Munger, B. L., see Sevier, A. C., *130
Muscle, fine structure, in the Kugelberg-Welander syndrome (chronic spinal muscular atrophy, *444

Myelopathy, necrotic, due to fibrocartilagenous venous emboli to the spinal cord, T168, *63
Myopathies, metabolic (three types of hypokalemic periodic paralysis, thyrotoxic myopathy and steroid-induced myopathy) electron microscopic observations in, T141

Nelson, E., D160
—, see Duffell, D., T161
—, D172
Neoplasms in hamsters induced by simian virus 40: light and electron microscopic observations, T161
Netsky, M., presidential address, the medical profession and neuropathology, T167, *1
Neuroaxonal lesions in mice injected with iminodipropionitrile with special reference to the vestibular system, distribution of, *599
Neurofibrillary degeneration, experimental production of, T139
— —, experimental production of, *187
Neurofibrillary degeneration, experimental production of, 2. electron microscopy, phosphatase histochemistry and electron probe analysis, *200
Neuromyelitis optica, relation to multiple sclerosis, T171
Neuronal storage, Pompe's disease (diffuse glycogenosis), *85
Neuropathologic study of fourteen cases of malignant brain tumor treated by neutron capture using Boron-10, T157
Neuropathological features of human organ transplantation, I. probable cytomegalovirus infection, *415
— study of experimental epileptogenic lesions in the cat, *502
Neuropathology and the medical profession, T167, *1
Neutron capture therapy using Boron-10, neuropathologic study of fourteen cases of malignant brain tumor treated by, T157
New, specific reaction for demonstrating fixative-stable plasmalogens, with special reference to brain, studies in the histochemistry of plasmalogens, *352
Nishikawa, K., see Roizin, L., T165
—, D165
Norton, W. T., M. Brotz, and S. R. Korey, studies in the histochemistry of plasmalogens, II, a new specific reaction for demonstrating fixative-stable plasmalogens, with special reference to brain, *352
Nurnberger, John, I., in memoriam, Saul R. Korey, M.D., *183

Observations on lesions induced by carcinogenic hydrocarbons, T159
Ojemann, R. G., see Asbury, A. K., T157
Okabe, N., see Fisher, C. M., *455
Optic nerves, electron microscopic observations on the developing human nervous system, T166k
Organ transplantation human, neuropathologic features of. I. probable cytomegalic virus infection, *415
Oxygen and glucose deprivation, ultrastructural and physiological observations on isolated rabbit retina during, T142

Pandolfi, S., see Clasen, R. A., T152
Pappius, H. M., L. A. Dayes, and J. B. Dossetor, cerebral swelling associated with rapid hemodialysis of uremic dogs, T147
Paraphenylenediamine staining of osmium-fixed plastic-embedded tissue for light and phase microscopy, *531
Peña, C., see Terry, R. D., T139, *200
Pentschew, A., see Garrow, F., T137
—, D137
—, D144
Periodic paralysis, hypokalemic, three types of, electron microscopic observations in, T141
Peripheral nerve sheath, diffusion of ferritin within, an electron microscopy study, *430
Permeability and morphological changes in the cerebral parenchyma adjacent to heterologous intracerebral tumors, *49
Phase and electron microscopic observations of Lewy bodies and melanin granules in the substantia nigra and locus caeruleus in Parkinson's disease, *398
Philippart, B. Rosenstein, and J. H. Menkes, isolation and characterization of the main splenic glycolipids in the normal organ and in Gaucher's disease: evidence for the site of metabolic block, *290
Pial arteries, effects of lead and other bivalent cations on, and their contractile response, T144
Pineal glands, human, x-ray diffraction and other studies of calcareous deposits in, *108, T137
Pinealoma histologic picture of, in silver carbonate preparations, T154
Plasmalogens, studies in the histochemistry of. II. a new specific reaction for demonstrating fixative-stable plasmalogens, with special reference to brain, *352
Pompe's disease (diffuse glycogenosis) with neuronal storage, *85
Popoff, N., see Feigin, I., *63, T108
—, see Feigin, I., T168
Presidential address, T167, *1
Presynaptic terminals, unusual neocortical in a patient with convulsions, mental retardation and cortical blindness, an electron microscopic study, *539
Prochlorperazine (Compazine, S. K. F.), golgi complex of cns: anatomotopographic studies following administration of, T165

Quantitative enzyme histochemistry of the rat cerebellum during development *in vivo* and *in vitro*, T168

Rabies, experimental, studies of cellular vulnerability, and pathogenesis using fluorescent antibody staining, *662
Radionecrosis, brain, chronic, study in, T162
Ramsey, H. J., ultrastructure of corpora amylacea, *25
—, fibrous long-spacing collagen in tumors of the nervous system, *40
Ravens, J. R., D138, D141, D149
Regional distribution of transketolase in the normal and thiamine deficient nervous system, *119
Relation of neuromyelitis optica to multiple sclerosis, T171
Relationship between extracellular space and blood-brain barrier, T152
Remyelination and demyelination in experimental allergic encephalomyelitis, further electron microscopic observations, *371
Response of astrocytes to brain injury, T142
Retina, isolated rabbit, during oxygen and glucose deprivation, ultrastructural and physiological observations on, T142
Richardson, E. P., see Mayman, C. I., *502
Robertson, D. M., intranuclear inclusions in meningiomas, T159
Roessmann, U., see Earle, K. M., T164
Roizin, L., and K. Nishikawa, Golgi complex of the CNS: anatomotopographic studies following administration of prochlorperazine (Compazine, S. K. F.), T165, D166
Rosenblum, W. I., D143
—, and B. W. Zweifach, effects of lead and other bivalent cations on pial arteries and their contractile response, T144, D145, D146, D149, D153
Rosenstein, B., see Philippart, M., *290
Rosner, S., cerebral angioma of the Sylvian fissure as a cause of complicated cerebral palsy, T175
Rosomoff, H. L., R. Hartstock, and R. A. Clasen, experimental brain injury following hypothermia, T146, D146
Ross, M. A., see Earle, K. M., T164
Roth, R. G., L. J. Graziani, R. D. Terry, and L. C. Scheinberg, muscle fine structure in Kugelberg-Welander Syndrome (chronic spinal muscular atrophy), *444
Rowland, L. P., see Schotland, D. L., *629
Rubenstein, L. J., D142
—, L. C. Scheinberg, and W. A. Levy, slide histochemistry study on the intermediary metabolism of various experimental tumors after intracerebral transplantation, T155, D155, D156, D162

Salsman, K., see Ledeen, R., *341
Samuels, S., N. K. Gonatas, and M. Weiss, formation of membranous cytoplasmic bodies in Tay-Sachs disease: an *in vitro* study, *256
Scharenberg, K., D141
—, histologic picture of pinealoma in silver carbonate preparations, T154, D155
Scheinberg, L. C., see Herzog, I., T153
—, see Rubenstein, L. J., T155
—, see Edelman, F. L., T160
—, see Herzog, I., *244
—, see Roth, R. G., *444
Schistosomiasis of spinal cord, latency and pathogenesis of, T167
Schneck, L., see Wallace, B. J., T169
Schneck, S. A., neuropathologic features of human organ transplantation, I. probable cytomegalovirus infection, *415
Schoenfeld, M. R., serum acid phosphatase activity and cerebral infarction, T176
Schotland, D. L., D. Cowen, L. M. Geller, and A. Wolf, histochemical study of effects of an antimetabolite, 6-aminonicotinamide on lumbar spinal cord of adult rat, *97
—, D. Spiro, L. P. Rowland, and P. Carmel, ultrastructural studies of muscle in McArdle's disease (deficiency of muscle phosphorylase) *629
Senile plaques, enzyme histological studies of, *477
Serum acid phosphatase activity and cerebral infarction, T176
Sevier, A. C., and B. L. Munger, technical note, a silver method for paraffin sections of neural tissue, *130
Shalit, M. N., the effect of metrazol on the hemodynamics and impedance of the cat's brain cortex, *75
Shanklin, W. M., see Brownson, R. H., T162
Sher, J. H., R. S. April, and S. M. Aronson, disseminated microabscesses of the central nervous system, T175
Siderocalcification, senile, of human brain, chelatable iron in, *675
Sidman, R. L., D140
—, see Konigsmark, B. W., T142
—, and R. Hayes, Jimpy: a mouse with inherited sudanophilic leukodystrophy, T172, D173
Silver method for paraffin sections of neural tissue, a technical note, *130
Simian virus 40, neoplasms induced by, light and electron microscopic observations, T161
Slagel, D. E., and H. A. Hartmann, the distribution of neuraxonal lesions in mice injected with iminodipropionitrile, with special reference to the vestibular system, *599
Slide histochemistry study on intermediary metabolism of various experimental tumors after intracerebral implantation, D155
Smith, D. E., see Klatzo, I., T149
Solitaire, G. B., some observations on the external granular layer of the human cerebellum, T176
Some biochemical, histochemical and fine structural aspects of a case of late infantile Tay-Sachs disease (Jansky-Bielschowsky type), T169

Some observations on the external granular layer of the human cerebellum, [T]176
Spiro, D., see Schotland, D. L., *629
Steinwall, I., see Klatzo, I., [T]149
Steroid-induced myopathy, electron microscopic observations in, [T]141
Streicher, E., see Terry, R. D. [T]139
—, see Klatzo, I., [T]149
—, see Klatzo, I., *187
Strouth, J. C., and W. Zeman, histochemical studies on lymphocytes in amaurotic idiocy, [T]176
Structure comparison of the major monosialogangliosides from brains of normal human, gargoylism and late infantile systemic lipidosis, part I., *341
Studies in globoid (Krabbe) leukodystrophy, III, significance of experimentally-produced globoid-like elements in rat white matter and spleen, *265
Studies in the histochemistry of plasmalogens. II. a new specific reaction for demonstrating fixative-stable plasmalogens, with special reference to brain, *352
Study in chronic brain radionecrosis, [T]162
Sudanophilic leukodystrophy, Jimpy: a mouse with inherited, [T]172
Suter, D. B., see Brownson, R. H., [T]162
Suzuki, K., R. Katzman, and S. R. Korey, chemical studies on Alzheimer's disease, *211
Swanson, P. D., see Lindenberg, R., [T]136
Swanton, M., see Allen, N., [T]174

Taghavy, A., see Ledeen, R., *341
Takeuchi, T., see Masumoto, H., *563
Tay-Sachs disease and gargoylism, ultrastructural and biochemical observations on a case of systemic late infantile lipidosis and its relationship to, *318
Tay-Sachs disease, formation of membranous cytoplasmic bodies in, an *in vitro* study, *256
Tay-Sachs disease late infantile, (Jansky-Bielschowsky type) some biochemical, histochemical and fine structural aspects of a case of, [T]169
Technical note, paraphenylenediamine staining of osmium-fixed plastic-embedded tissue for light and phase microscopy, *531
Tellurium, non-toxic amounts fed rats during pregnancy, hydrocephalus in offspring of, [T]137
Temporal and spatial evaluation of cerebral edema secondary to cold probe lesions, [T]145
Tennyson, V., [D]167
—, see Duffy, P. E., *398
Terry, R. D., [D]138, [D]150
—, C. Peña, E. Streicher, and I. Klatzo, experimental production of neurofibrillary degeneration, [T]139
—, [D]143
—, and C. Peña, experimental production of neurofibrillary degeneration. 2. electron microscopy, phosphatase histochemistry and electron probe analysis, *200
—, see Aleu, F. P., *304
—, see Gonatas, N. K., *575
Thiamine deficient and normal nervous system, regional distribution of transketolase in, *119
Thiamine deficiency of nervous tissue, experimental studies using tissue culture technics, [T]139
Thyrotoxic myopathy, electron microscopic observation in, [T]141
Tissue culture technics in experimental studies on thiamine deficiency of nervous tissue, [T]139
Tomiyasu, U., and R. N. Baker, mucormycosis, clinical and pathological aspects, [T]177
Torack, R. M., adenosinetriphosphatase activity in cerebral edema due to alkyl tin intoxication, [T]152
—, [D]153
Transketolase, regional distribution of in normal and thiamine deficient nervous system, *119
Transneuronal cell atrophy, distribution of cell size in lateral geniculate nucleus of man following, *653
Tumor, brain, malignant, neuropathologic study of fourteen cases treated by neutron capture study using Boron-10, [T]157
Tumor transplants, brain's reaction to, a histological study of, is brain an immunologically privileged site?, [T]160
Tumors, experimental, slide histochemistry study on intermediary metabolism of, after intracerebral implantation, [T]155
Tumors, intracerebral, in rabbits, edema, associated with biochemical and morphologic study of, [T]153
Tumors, of the nervous system, fibrous long-spacing collagen in, *40

Ultrastructural and biochemical observations on a case of systemic late infantile lipidosis and its relationship to Tay-Sachs disease and gargoylism, *318
— and physiological observations on isolated rabbit retina during oxygen and glucose deprivation, [T]142
— studies of muscle in McArdle's disease (deficiency of muscle phosphorylase), *629
Ultrastructure of corpora amylacea, *25
— of human cerebral edema, [T]150
Unusual neocortical presynaptic terminals in a patient with convulsions, mental retardation and cortical blindness, an electron microscopic study, *539
Uremic dogs, cerebral swelling associated with rapid hemodialysis in, [T]147

Vascular permeability in brain, use of double tracers in study of, [T]149
